Instructions:

Print this page and cut with scissors along dashed lines.
Place cut page in top/center of windshield to determine
approximate matching curve for your graphic.

A series of 11 thick black curved lines, labeled A through K from top to bottom. The lines are arranged in two columns: A through J on the left and K on the right. The curves vary in their degree of upward or downward curvature, with A being the most curved and K being the flattest. The lines are intended to be used as templates to match the top curve of a windshield.

Match edge of lines with top curve of windshield.
